Visual Analog Scale

The Visual Analog Scale (VAS) is a 100-millimeter line with “no pain” on one end and “pain as bad as it can be” at the other end. This scale is a very simple form of assessment. Patients are expected to mark on the line the amount of pain they are experiencing.

The VAS score is determined by measuring in millimeters from the left hand end of the line to the point that the patient marks.

VAS score:
